

[FAQ]

Is it able to connect two devices, NVRv8.59 and Backup Center v1.12 under LAN? What about WAN?

Release Date: 3/06/2015

Applied to

NVR v8.59, Backup Center v1.12

Question

Is it able to connect two devices, NVR v8.59 and Backup Center v1.12 under LAN?

Answer

Yes, absolutely! However, it is not recommended to use WAN to connect two mentioned devices because such kind of environment might not have lots of bandwidth as much as LAN environment does. In addition, it is expected to spend extra money in order to upgrade upload speed.
