

## [FAQ]

### SD2301/2411/PPTZ7300 Support AC24V?

Release Date: 03/29/2016

#### Applied to

SD3201/2411/PPTZ7300

#### Question

Can I use external AC24V with SD2301/2411/PPTZ7300?

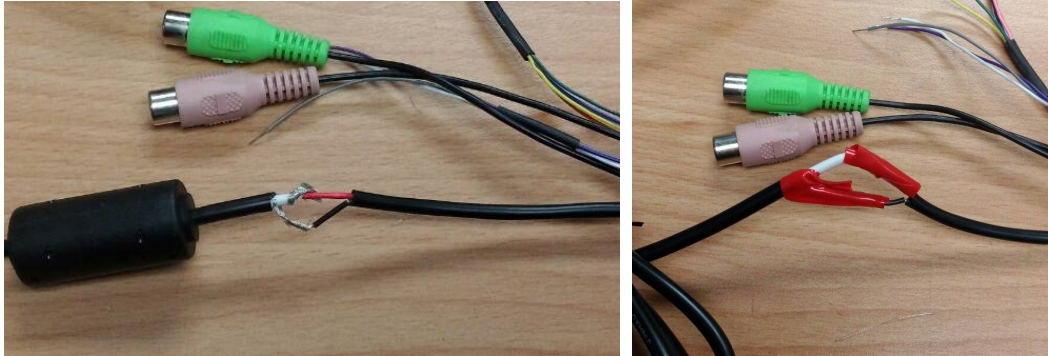

#### Answer

In order for SD2301/2411/PPTZ7300 to support external AC24V power source, user might use the adapter cable came with the camera or remove the adapter socket manually following the steps provided below.

1. Cut off the adapter socket to reveal the power contact wires.

2. Connect the DC/AC24V Power cable and use insulation tape to cover the wires

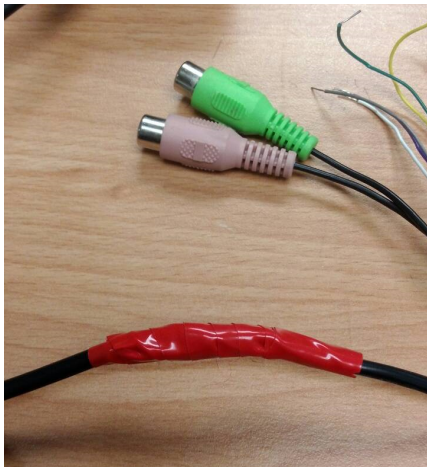

---

**Note:**

SD2301/2411/PPTZ/ are compatible with AC power source (+/- marking not required)

---

3. Apply additional insulation tape to cover all the power wires
