

[FAQ]

VMS Limitation of Account Numbers

Applied to

GV-VMS 15.10.1.0

Question

1. How many concurrent users can one account from VMS be used simultaneously from different PCs?
2. How can we limit the number of users that can use one account simultaneously?
3. How many users (power user, supervisor, user, guest) can we add?

Answer

1. For GV-VMS service please check the table below:

Item	Max
Mobile Server	Unlimited
Webcam Server	200
Control Center Service	16
Remote Viewlog	16
Remote Destop	16
Bandwidth Control	16

2. GV-VMS cannot limit an account login times simultaneously, but it can limit the account expire days as a valid period.
Please note GV-VMS is limited to accept **16 connections at a time**.
3. For account numbers in GV-VMS can store up to **1000 user accounts**.
