

[FAQ]

Change Multiple Admin password for IP Cameras

Applied to

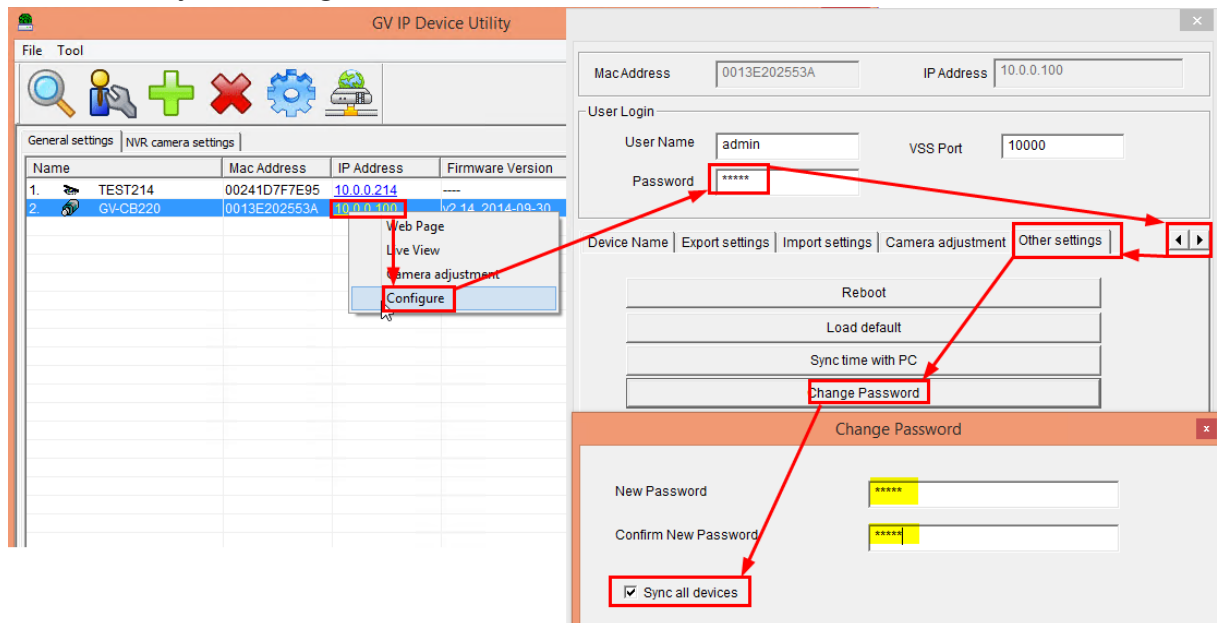

All IP Cameras

Question

Does something to change multiple admin passwords at once? I have about 400 cameras needing to be changed.

Answer

For the IP Camera change the password in the same time, please use the GV-IP Device Utility to manage all device has scanned.

The screenshot displays the GV-IP Device Utility interface. On the left, a table lists scanned cameras:

Name	Mac Address	IP Address	Firmware Version
1. TEST214	00241D7F7E95	10.0.0.214	---
2. GV-CB220	0013E202553A	10.0.0.100	V2.14.2014.00.30

A context menu is open over the second camera, with 'Configure' selected. Red arrows show the navigation path: from 'Configure' to the 'Other settings' tab, then to the 'Change Password' button, and finally to the 'Change Password' dialog box. In this dialog, the 'Sync all devices' checkbox is checked.
